## What is Brain Tumor Action Week?

*Brain Tumor Action Week is the collaborative effort of the brain tumor community - patients, families, friends, health care providers, and others - to educate the public about brain tumors. It was organized by the North American Brain Tumor Coalition (NABTC) to raise awareness and advance the fight for a stronger brain tumor research program.*

*The primary goal of Action Week is to convince others to join in the fight for an increase in funding for brain tumor research and the development of and access to better treatments.*
